For delivering safe regenerative medical products to patients・・・

For regenerative medicine, CPC（Cell Processing Center）

SUMILON SuperQuality series

Sumitomo Bakelite Co., Ltd.

SUMILON SuperQuality series is produced under special quality management

☑ SAL10^{-6} Sterility certified	Sterilization following ISO11137-2(JIS T0806) (Except frequency in periodic validation process: once a year)
☑ Material safety	Selected after combustion, extractable substance and cytotoxicity tests based on Japanese Pharmacopoeia
☑ Pyrogen level	Endotoxin level(below 0.25EU/mL) inspection for every lot
☑ Appearance inspection	100% visual inspection
☑ Packaging	3 layered package, Package in small quantity
☑ Expiration period	3 years after production

Packaging for dishes (example)

SUMILON SuperQuality Pipette（1st layer package of the triple packaging）

Q & A

No	Question	Answer
1	How are foreign particles inspected for triple packaging?	All items are inspected for foreign particles by visual inspection.
2	How is sterilization conducted?	After triple packaging, the products are sterilized by radiation.
3	Are there any statements regarding sterilization assurance levels?	Yes, they are on the inspection report by each lot. Sterilization is conducted according to the sterilization dose of SAL 10-6 established by a method in accordance with ISO 11137-2/JIST0806-2
4	Can certificates be issued for animal origin (especially BSE / TSE)?	Yes, it is possible.
5	Are materials tested for safety?	combustion test, extractable substance test, and cytotoxicity test are conducted based on Japanese Pharmacopoeia.
6	How can you be sure that the product has been sterilized?	An indicator is affixed to the product box as proof of sterilization.
7	Is sterility guaranteed inside the triple packaging?	We guarantee SAL 10-6 only within the most inner packaging.

【Plant located in Akita】

100% visual inspection for foreign particles
